## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Kampf et al. (PN 5,341,675).

Regarding claim 1 Kampf discloses providing a cam sensor wheel (See Figure 6 (37)) having a plurality of teeth including an index (See Figure 6 (37)) tooth formed upon the circumference of the cam sensor wheel; providing a sequence of pulses (See Abstract, Column 5 Lines 52-68, Column 6 Lines 1-5) corresponding to the plurality of teeth; and using one tooth among the plurality of teeth for identifying the direction of cam torque (See Title, Abstract, Column 5 Lines 52-68, Column 6 Lines 1-51).

Regarding claim 2 Kampf discloses using the plurality of teeth to determine a dead time (See Column 1 Lines 64-68, Column 2 Lines 1-3).

Regarding claim 3 Kampf discloses the step of pausing controller

Art Unit: 3748

updating during dead time (See Column 1 Lines 64-68, Column 2 Lines 1-3), thereby when there is no torque available to drive the VCT (See Figure 1 (1), (2)) towards its commanded position, the controller stops accumulating unnecessary values.

Regarding claim 4 Kampf discloses the plurality of teeth is symmetrically (See Figure 6 (37)) distributed upon the circumference of the cam sensor wheel.

Regarding claim 5 Kampf discloses the plurality of teeth is asymmetrically (See Figure 8 (6), (7), (8), (9)) distributed upon the circumference of the cam sensor wheel.

Regarding claim 6 Kampf discloses the one tooth is the index tooth (See Figure 6 (37)).

Regarding claim 7 Kampf discloses the VCT system is a CTA VCT system (See Figure 6 (37)).

Regarding claim 8 Kampf discloses the VCT system is a TA VCT system (See Figure 6 (37)).

Regarding claim 9 Kampf discloses the VCT system is a OPA VCT system (See Figure 6 (37)).

Regarding claim 10 Kampf discloses the cam tooth wheel is asymmetric (See Figure 6 (20)).

Regarding claim 11 Kampf discloses the cam tooth wheel is symmetric (See Figure 5 (21)).

### **Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Scotti et al. (PN 6,131,686), Buckley et al. (PN 5,173,651) disclose similar VCT systems.
